

TA-FE3TD-IQ Fume Extractor

1. Fume extractor & Filter Photos:

PA-300TD fume extractor

2. Application : Suitable for air purification, dust collection and adsorb smell/fumes for laser marking metal, Soldering, lab, , etc.

3. Fume Extractor introduction :

- (1). Strict welding and painting technology achieve to high tightness and corrosion resistance cabinet;
- (2). Special sound- absorbing materials reduce operating noise to improve working efficiency;
- (3). Taiwan brushless blower, PWM speed control, Alarm system after filter block;
- (4). Four layers filter modules to make sure most fumes & particles to be filtrated, protect environment security;
- (5). Integrated cabinet with trundle, more freely, small foot print, installed easily, decreasing energy consumption;

4. Fume Extractor Datasheet:

Air flow & Pressure: 300m ³ /h , 2500Pa	Power: 200W
V / F: 220V/50Hz	Noise: ≤55dB
Size: 255*415*450mm	Filter: F5+F8+H13+Gas filter
Filter quantity: 4 layers	Filtration efficiency: 99.97% @ 0.3um
Exhaust pipe: Φ75 x 1450mm	Weight: 17kg

Expert in Fume Extraction, Dust Collection & Oil Mist Purification
